

Front Load Flat Top Container

Intersteel Flat Top Front Load containers are used for many commercial applications - most popular in parks, apartments and locations where easy waste and recycling disposal is important. The Intersteel Flat Top is user-friendly with the convenience of a low top and a variety of add-on options for specific needs. The Flat Top comes with a variety of user application options - such as a cardboard recycling slot and slide door. The Intersteel Flat Top also has options for operator efficiencies such as the pull box for those tight and tucked away locations. All containers are finished with non-lift primer and double coat of paint.
